Getting oriented in the price list

The first page contains prices for transport into Slovakia and other European destinations. On the following page, you will find prices for the DPD Guarantee Service (ensure fast delivery abroad with a guaranteed term) and the list of Additional Services.

Calculating the price for transport

The price depends on the parcel weight and does not include the toll fee and fuel surcharge (their current amounts are available at www.dpd.cz).

Important parameters

Weight (max. 31.5 kg), Length of the longest side (max. 175 cm) and Girth (max. 300 cm, can be calculated according to the following formula: $(2 \times \text{width} + 2 \times \text{height} + 1 \times \text{length})$). For delivery into Pickup Points, the maximum parcel weight is 20 kg, maximum length is 100 cm and maximum girth is 250 cm. You can find the parameters of parcels using DPD boxes on the DPD websites of individual destinations (e.g. for delivery to boxes in Slovakia - www.dpd.sk).
